Research Question Activity

In you groups, decide if each of the questions below are good research questions or not. If not, try revising the question to improve it. Remember, good questions have the following features:

- Simple
- Require judgment
- Lead to debate
- Has multiple perspectives
- Manageable scope
- Clear vocabulary
- Researchable
- Allow for middle ground

1. What are the advantages and disadvantages of nuclear power stations?

2. Do humans cause global warming and can we alleviate the effects?

3. Is the world a safer place with nuclear weapons?

4. Aid or Trade?

5. Is cryogenics only an option for the rich as well as an immoral use of resources?

6. What are the key policies in trying to tackle over-population and how effective are they?
